

These data were extracted from the GADM database (www.gadm.org), version 2.0, December 2011. **They can be used for non-commercial purposes only.** It is not allowed to redistribute these data, or use them for commercial purposes, without prior consent.

The GADM project created the spatial data for many countries from maps and lists of names available on the Internet (e.g. from Wikipedia). Others are derived from spatial databases provided by national governments, or other organizations. Below is a list of the main sources, by country.
